Hi Amy.

The CWM Chemical Services, LLC, Model City facility is considered acceptable to receive waste regulated by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Off-Site Rule (OSR) within the limitations of its permits.

PLEASE NOTE: The OSR establishes compliance criteria and release criteria, and establishes a process for determining whether facilities are acceptable based on those criteria. However, once a facility's OSR acceptability status has been determined, EPA assumes that such facility will only accept waste, and waste will only be sent to such facility, which complies with the relevant permits issued by government officials. Therefore, please contact the appropriate agencies (federal, state, local) to verify the facility has the authority to receive this waste prior to any shipments of waste.

Additionally, please also be aware that EPA believes the Mercury Export Ban Act (MEBA) prohibits export of mercury-contaminated media (and other materials) if the intent of the export is to recover and sell or use the mercury. For additional information, you can visit EPA's "Questions and Answers about the Mercury Export Ban Act of 2008" webpage.
